Professional Summary

Software Engineer specializing in **Java, Spring Boot, REST APIs, and microservices**, with hands-on experience building authentication, onboarding, loyalty, observability, and **AI-enabled log investigation systems**. Strong foundation in **DSA, system design, databases, distributed systems, and Generative AI**, with experience developing production-grade backend solutions.

Technical Skills

Languages: Java, Python, SQL, JavaScript, TypeScript
Backend: Spring Boot, Spring AI, FastAPI, Microservices, Kafka, Node.js
AI & GenAI: LLMs, Spring AI, Prompt Engineering, AI Agents
Databases: MySQL, PostgreSQL, MongoDB, Redis
Cloud & DevOps: AWS, Azure, Docker, Git, CI/CD
Observability: OpenTelemetry, Distributed Tracing, Structured Logging
Developer Tools: Claude Code, Cursor, GitHub Copilot

Work Experience

Software Engineer Oct 2025 – Sept 2026
Salescode AI *Gurugram, India*

- Developed production-grade **Java/Spring Boot microservices and REST APIs** for authentication, onboarding, password recovery, loyalty workflows, and secure service-to-service communication.
- Implemented **SSO and OAuth 2.0** with token issuance, refresh/revocation, and session validation, establishing a reusable authentication layer adopted across **10 services**.
- Built **OpenTelemetry-based observability** with structured logging and distributed tracing, and developed reusable onboarding automation for **7 clients/LOBs**, reducing setup time to approximately **2 hours**.
- Proactively built an **Authentication Configuration Portal** adopted by **10 LOBs**, enabling self-service configuration of login/password flows, policies, and OTP providers without backend code changes; also implemented a client-specific data transformation layer for varying integration schemas.
- Engineered **multi-device login** support with concurrent session management, per-device token issuance, and device-level revocation, enabling users to maintain secure independent sessions across web, mobile, and tablet clients simultaneously.
- Designed and implemented a **custom biometric authentication system** with a two-phase challenge-response flow — registration generates a cryptographic challenge and time-bound intent, while login verifies a device-scoped signature against the stored public key; supports both **RSA and ECDSA** algorithms, enforces single-use intents, one-user-per-device binding, and TTL-based challenge expiry with **15 typed error codes** across all failure paths.

Projects

AI-Powered Log Investigation System
Java, Spring Boot, Spring AI, Langgraph Langgraph, SQL *Salescode AI*

- Initiated and developed an **AI-powered error-log investigation system** using **Spring AI and LLMs**, enabling engineers to analyze production errors through natural-language queries and reducing manual log investigation effort.
- Designed a controlled **read-only log analysis workflow** where the backend retrieves error logs for user-selected time ranges and provides relevant log data to the LLM through Spring AI for contextual failure analysis and root-cause summarization.
- Implemented a **SQL proxy security layer** restricting AI-assisted database access to **SELECT-only operations**.

BarterNow: AI-Powered Sponsorship Platform
Python, FastAPI, React, Express.js, Prisma *Live — GitHub*

- Built a two-sided platform connecting brands with event organizers using an **AI-driven recommendation engine** based on event analytics and audience demographics.
- Integrated **Razorpay** with idempotent webhook handling for reliable payment capture and settlement tracking, and shipped real-time ROI dashboards.

Certifications

Oracle Certified Agentic AI Foundations Associate
Oracle Cloud Infrastructure Certified Generative AI Professional

Education

ABES Engineering College Ghaziabad, Uttar Pradesh
B.Tech – Computer Science and Engineering ***(CGPA: 8.02/10)*** *2022 – 2026*

Achievements

- Solved approximately **600+ problems on LeetCode** and **1,200+ problems across competitive programming platforms**; LeetCode Rating: **1812**.
- Recipient of the **National Means-cum-Merit Scholarship**, a merit-based national scholarship awarded to high-performing students.
